

Letter from our CEO

In response to COVID-19, we have been following the recommendations from public health professionals and monitoring developments. During this time, I wanted to extend a hand and inform you on how we are approaching the situation at Nationwide Medical Licensing.

Most importantly, we stand in solidarity with the individuals who have been impacted by COVID-19, either directly or indirectly. Furthermore, we are dedicated to the health and safety of our employees. Nationwide Medical Licensing is committed to providing a clean workplace for all employees by cleaning the office more and have added extra antibacterial products and stations. To ensure that everyone is safe, we are also stressing the need for social distancing in our office.

We are truly grateful and appreciative of the generous healthcare workers, all over the world who are on the front lines working diligently to care for people in need.

Our slogan has always been to take care of our providers while they take care of their patients. Therefore, our focus, commitment, and services are unwavering as we tackle this pandemic.

We will continue to monitor the news and any reports or requirements from the CDC and local, state and federal governments.

The Nationwide Medical Licensing team hope you and your loved ones remain safe and healthy.

Alexis McGuire
